

xThe project built a mobile portal server which transform news and articles on [www.tdctrade.com](http://www.tdctrade.com) for online and offline browsing. Besides common mobile devices, the system also supports Palm Doc format for offline browsing. User may login to the [www.tdctrade.com](http://www.tdctrade.com) to add articles to his own 'shopping cart', and he may synchronize the article to his own PDA when the PDA is plugged to a computer.

The mobile version can be accessed at <http://mobile.tdctrade.com> .
